START WITH THE HOMEOWNER. WIN AS THE CONTRACTOR.

Homeowners don't ask for ventilation — they ask about comfort, energy bills, and roof problems.

The Simple Solution: Active Solar Attic Ventilation

Passive ventilation depends on wind and temperature differences — which means it often underperforms when homeowners need it most.

The Homeowner's Problem

- ✗ Hot, uncomfortable upstairs rooms
- ✗ High cooling costs
- ✗ Moisture, mold, or musty odors in the attic
- ✗ Premature shingle wear and roof damage

The Attic Breeze Solution

- ✓ Improved indoor comfort
- ✓ Lower cooling costs
- ✓ A drier, healthier attic
- ✓ Better ventilation and improved roof performance

Attic Breeze Creates Airflow

Our solar attic fans actively pull hot, moisture-laden air out of the attic while drawing fresh outside air in through intake vents. This creates consistent airflow on hot, still days—when passive vents struggle.

And for you, the contractor: fewer complaints, fewer callbacks, and a better long-term roof system.

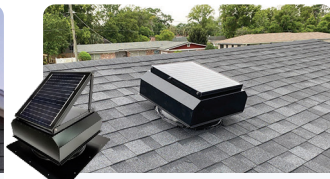

Which Attic Breeze Fan is Right for the Job?

GableBreeze™ Series

The retro-fit solution.

Ideal when roof-mount installation isn't preferred or isn't an option. Delivers active ventilation while preserving existing rooflines.

UltraBreeze™ Series

Maximum airflow. Built to last.

Designed with an elevated profile to move more air across a wide range of conditions.

AeroBreeze™ Series

Low-profile. Modern. Efficient.

A sleek, roof-friendly design that blends seamlessly with modern rooflines.

CoreShield™ Construction

*Professional-Grade.
Standard on Every Fan.*

CoreShield™ is the shared DNA of every Attic Breeze solar attic fan. Each model is built with the same professional-grade materials, safety features, and durable construction — no matter which series, line, or model is selected.

✓ *All-metal construction with balanced blades*

✓ *Whisper-quiet operation (<30 dB)*

✓ *Built-in fire safety features*

✓ *Designed for harsh climates and severe weather*

✓ *Lifetime Limited Residential Warranty*

*Built for professionals.
Trusted by homeowners.*

Designed to help you win the job—and protect your work long after. Attic Breeze is engineered to help contractors:

✓ *Sell smarter upgrades homeowners understand*

✓ *Reduce risk and costly callbacks*

✓ *Deliver more value with confidence*
